

# THE ADVANCED PANEL PROTECTOR

SR 315

Smart Rider Panel Vests benefit from a unique structure, with independently shaped panels that ensure the best fit for any body morphology. The articulated panels conform to your body shape as you move. Over-the-shoulder and round-the-waist Velcro flaps allow precise height adjustment and easy adjustment to different body forms.

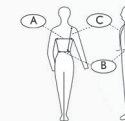

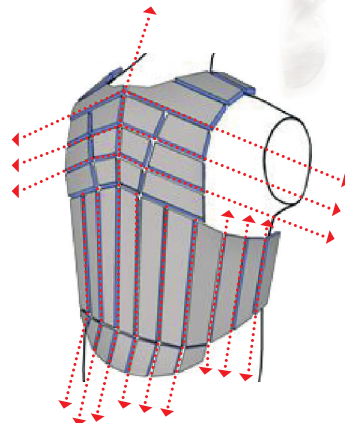

The panels are made of layers of very light foam.

Small spaces between the panels allow air to circulate providing effective ventilation.

All Panel Vests are certified to EN13158 - 2018 European standard Level 3 and BETA Level 3.
